

STUDY VOLUNTEERS with TYPE 2 DIABETES

WANTED!

To participate in a research study to investigate

ACUTE CLIMATE CHANGE and CARDIOVASCULAR HEALTH in TYPE 2 DIABETES

The study involves 5 separate visits (in the morning after an overnight fast) to the Exercise Physiology Lab, Launceston Campus, where blood and blood pressure will be tested while resting in different environmental climates

Breakfast will be provided after testing

At the end of your visits you will be provided with information about your cardiovascular & metabolic status

If you are over 18 years of age with diagnosed, stable and non-insulin dependent Type 2 Diabetes, and you're interested in taking part in this study, and/or would like more information kindly contact:
